

JOB DESCRIPTION FOR
FULL STACK DEVELOPER

Job Description for Full Stack Developer

uAfrica Technologies (uafrika.com) is looking for a permanent mid to senior-level, young and energetic Full-Stack developer to join our small tech start-up team in Pretoria.

uAfrica operates in the eCommerce space and is a very well-known company in the Shipping and Fulfilment space. We love working with cutting-edge technology and focus on the technology that gets the job done. As a tech SME in a growth spurt, uAfrica needs a hands-on, logical person who is willing to jump right into the thick of things and get going; someone who isn't afraid to put their ideas forward, is self-disciplined and determined.

If you join our team, you will be based in our head office in Menlyn, Pretoria and will be involved in one or more of the SaaS solutions that we currently offer.

REQUIREMENTS:

- Matric required.
- Fluency in English essential.
- Ideally, we need someone who is available to start immediately or with a week or two notice.
- An IT or Engineering qualification is preferred.

SALARY

- Salary is market related.

SKILLS REQUIRED:

Technology that we currently use:

- PHP,
- React,
- JavaScript,
- MySQL,
- AWS.
- A strong focus on back end development is preferred.
- Bonus Points: Golang and Lambda

*Preference will be given to candidates based in Pretoria.
